

PRODUCTS MADE
FROM OIL AND
NATURAL GAS

Petrochemicals derived from oil and natural gas make the manufacturing of **over 6,000** everyday products and high-tech devices possible. Major petrochemicals—including ethylene, propylene, acetylene, benzene, and toluene, as well as natural gas constituents like methane, propane, and ethane—are the feedstock chemicals for the production of many of the items we use and depend on every day.

Modern life relies on the availability of these products that are made in the United States and across the globe. We zero in on some of these common household and commercial products below. The list may surprise you!
